

INTERWRITE RESPONSE

The COMPLETE Student Response Family

Interwrite™ PRS Response software Education's Most Feature Rich System

- Completely redesigned user interfaces, making the software intuitive and easy to setup and use; for example, all preferences for the application are in a Global Preference Section.
- Enhanced roster management and automatic attendance monitor.
- Ability to create multiple sections per class; allowing for segmentation of the classes and sections.
- Runs on Windows, Mac, and Linux and you can import questions and lessons from ANY source!
- Instant grading and reporting features saves time.

Interwrite™ Cricket Friendly, Fun and Value Priced

- Powerful, yet simple to use
- Combines robust RF technology with a friendly look and feel

Interwrite™ PRS Education's Most Feature Rich System

- Available in Radio Frequency (RF) for large classes or lectures or Infrared (IR) versions for smaller class sizes

Interwrite™ Virtual Clickers Flexibility In A Networked Environment

- All the great features of the hand held clickers, plus...
- Use on students laptops or PDAs, with or without a mixture of Interwrite™ Clickers
- Individual and Site licenses available

Available in the UK from Banxia Software Ltd

WHICH STUDENT RESPONSE CLICKER IS RIGHT FOR ME?

Interwrite™ PRS RF is ideal for:

- Larger class settings; simple installation for large lecture halls.
- Classes that will ask more complex questions including numeric, rank order, fractions and decimal points, and even short answer.
- Teachers looking for Homework & self-paced modes - students can work at their own pace or take home to complete assignments.
- Schools and colleges looking for a competitively priced student response system with the most advanced features on the market.

Interwrite™ Virtual Clicker is ideal for:

- Classroom settings that wish to use a combination of personal computers, PDAs and/or PRS RF clickers.
- Computer labs where each student has access to their own computer.

Interwrite™ Cricket is ideal for:

- Classroom sizes can be small or large.
- Classes that will only ask multiple choice, true/false type questions, or surveys.
- Schools looking for a lower cost student response system.

Interwrite™ PRS (infrared) is ideal for:

- Smaller class settings.
- Classes that will only ask multiple choice type questions.
- Schools looking for a lower cost, entry level student response system.

Interwrite™ Clickers all work with the same software and the same receiver—use as stand alone products or an assortment of each!

Our systems are easy to use and support and are highly portable — the Response RF Receiver does not rely on line-of-sight transmission, so a special mount is not necessary.
